Managed By Nabo Capital Limited

# KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision and whether to invest.

## OBJECTIVES AND INVESTMENT POLICY STATEMENT

### Investment Objective

**Investment Objective**  
The investment objective of the Fund is to achieve consistent risk-adjusted returns with minimal volatility and low correlation to most traditional asset classes.

## Investment Policy

The fund will primarily allocate capital to loans originated by the Manager or issuers or managers of credit pools, to take advantage of opportunities in the private debt markets through direct lending, syndicated loans, mezzanine debt, structured credit and asset-based lending.

## RISK AND REWARD PROFILE

### Why is this Fund in Category 4?

This Fund operates by pooling investor's assets and investing into private debt instruments including corporate papers and bonds from approved issuers.

The primary risk lies in the illiquidity of these investments, as private debt typically lacks active secondary markets. However, this illiquidity comes with a premium in the form of higher yields. Credit risk is also a consideration, as repayment depends on the financial health of the borrowers; our rigorous due diligence and structuring ensures this risk is mitigated.

### What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a risk of suffering large losses.

A **Category 1** funds is not a risk-free investment – the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1.)

### More about this rating

This rating system is based on the average fluctuations of the prices of funds over the past 5 years, that is, by how much the value of their assets taken together has moved up and down. Historical data, such as used in calculating the synthetic risk indicator, may not be a reliable indication of the Fund's future risk profile.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.
